

Name of the Department: Tahaffuzi wa Samaji Tibb

About the Department:

Tahaffuzi Tibb (Preventive Medicine) is a branch of medicine which aims to prevent diseases and promote health so as to live a productive life. Department of Tahaffuzi wa Samaji Tibb (Preventive and Social Medicine) is one of the 14 departments of Unani Medicine. The main aim of the department is prevention of diseases and promotion of health. Asbab-e-Sitta Zarooriya (Six essential causes of health) are very important for healthy life. They are not only fundamentals of Tahaffuzi wa Samaji Tibb but important for practical implications of Ilaj-bit-Tadbeer (Unani Regimenal Therapy). The department also imparts education on the subject of Tibb e Qanoon wa Ilmul Samoom to under graduates. This discipline provides the knowledge on the subject of Forensic medicine, Anthropology, Modes of deaths, Procedure of Postmortem, all sorts of injuries, etc and also about applied toxicology.
