

## Name of the Department- Shalya Tantra

### About the Department:

Shalyatantra is one of the distinct branches of Ashtang Ayurveda. Ayurvedic shalyatantra explains and demonstrates surgical knowledge and procedures that were performed and used since thousands of years and are useful even today.

Now a day's world is turning to Ayurved for comprehensive treatment of diseases. Surgical knowledge and treatments of disease described in shalyatantra can be researched and used in diseases with minimum complications and side effects. Maintained its importance even today, wound healing has impact gained more importance.

Ksharasutra (caustic cauterizes), agnikarma (thermo cautery), raktamokshan (blood letting) are the outstanding parasurgical techniques practiced. The knowledge of ancient principles of longevity of Ayurveda in regard to surgical and para-surgical concept of diseases, their treatment and betterment of patients is also taught during the course
